

Incidents go unreported. Actions get lost. The next one was preventable.

One safety, health & environment platform that runs entirely inside Microsoft 365 — from near-miss capture to Kaizen improvement, with trending that flags the incident *before* it happens.

- 90% faster incident reporting
- In your tenant
- Zero per-seat fees
- ISO 45001 · OHS Act

Zero incidents this month — near-miss cluster forecasts an injury

GREEN

The trend reads the near-misses, not the headline. The third area is incident-free today — and a near-miss cluster forecasts a lost-time injury before anyone files a report.

Near-misses go unrecorded. Investigations stall. Evidence lives everywhere but your tenant.

Under-reported risk

Near-misses go unrecorded and paper forms sit in trays. By the time an incident is logged, the warning signs were already there.

Stalled investigations

Root-cause analysis drags on for weeks. Corrective actions are assigned verbally and forgotten — so the same incidents keep recurring.

Ungoverned safety data

Records scatter across third-party SaaS your IT team can't see, govern or secure — and audit evidence is a scramble when regulators arrive.

DWx SHE & CI replaces the paper and the SaaS sprawl with one platform inside Microsoft 365 — closing every event from report to Kaizen improvement, with near-miss trending that **flags the incident before it happens**. Every action tracked; every life protected.

One closed-loop platform — report to improvement.

Not another siloed safety app. Every event flows from capture through investigation and CAPA to Kaizen improvement — and back into prevention. People decide; the platform makes sure nothing is lost.

Incident & Near-Miss Capture

Mobile-friendly reporting with photo evidence, GPS tagging and severity classification. Workers log an incident or near-miss in under two minutes, from anywhere on site.

Hazard ID & Risk Assessment

Structured hazard identification with a likelihood x severity risk matrix, so interventions are prioritised on data — linked to the location, equipment and process at risk.

Investigation & Root Cause

Guided 5-Why and fishbone workflows with evidence attachment. Investigators are assigned automatically and escalation rules make sure nothing stalls.

CAPA Tracking to Closure

Every corrective and preventive action is assigned, reminded, escalated and verified. Closure is proven, not assumed — 100% follow-through.

Kaizen Continuous Improvement

Turn safety learnings into measurable process change. Improvement proposals, impact tracking and team collaboration stop the same incident recurring.

Safety KPI Dashboards

Live LTIFR, TRIR, severity rates and leading indicators, drill-down by site, department or period. Board-ready reporting in a single click.

Everything you need for safety excellence — in one place.

- ✓ Incident Reporting

— photo evidence, GPS, severity classification
- ✓ Near-Miss Trending

— proactive capture turned into prevention intelligence
- ✓ Hazard & Risk Assessment

— likelihood x severity risk-matrix scoring
- ✓ Investigation Workflows

— 5-Why, fishbone, evidence & witness statements
- ✓ CAPA Tracking

— assigned, escalated, verified to closure
- ✓ Safety Inspection Checklists

— configurable, recurring, multi-site
- ✓ Kaizen CI Tracker

— improvement proposals & impact tracking
- ✓ Safety KPI Dashboards

— LTIFR, TRIR, severity & leading indicators
- ✓ Regulatory Compliance

— OHS Act, ISO 45001, OHSAS 18001
- ✓ DWx Risk & Audit Integration

— enterprise risk register, full SharePoint audit trail

What third-party safety SaaS can't do.

Compared with the standalone safety platforms most teams bolt on around Microsoft 365 — SafetyCulture (iAuditor), Enablon, EHS Insight.

Capability	DWx SHE & CI	Third-party safety SaaS
Runs inside your Microsoft 365 tenant	Yes	No
Zero safety data leaving your environment	Yes	No
Priced per tenant — no per-seat SaaS fees	Yes	No
Kaizen / CI project tracking built in	Yes	No
Feeds your enterprise risk register & audit trail	Yes	No

Measurable impact from day one.

Faster reporting, complete action closure, fewer repeat incidents — and audit evidence that's always ready.

90%↑

Faster incident reporting

Mobile capture with photo evidence in under two minutes replaces paper forms and filing trays.

100%↑

Corrective action closure tracking

Every CAPA assigned, reminded, escalated and verified — nothing falls through the cracks.

50%↓

Fewer repeat incidents

Root-cause analysis and near-miss trending address systemic causes, not just symptoms.

0↓

Audit documentation gaps

Every incident, investigation and action stored in SharePoint with full version history.

A tailored view for every seat at the table.

SHE MANAGER

Compliance dashboards & investigation tracking

"Show me every open investigation, every overdue corrective action, and our LTIFR trend — in one place, ready for the board and the regulator."

LINE MANAGER

Report in two minutes, from the floor

"When something happens on my shift, I need to log it in under two minutes — from my phone, with a photo — and know it's being tracked."

SAFETY COMMITTEE

Trends, actions & Kaizen projects

"We review trends, approve Kaizen projects, and check corrective actions are actually closing. We need data, not anecdotes."

— ENTERPRISE-GRADE · MICROSOFT-NATIVE

It runs in your tenant. Microsoft bills you directly.

Built on proven Microsoft technologies with workflow automation at its core — no third-party databases and no data lock-in. SHE & CI runs in your Azure subscription in South Africa North, and you remain the data controller — safety records never leave your environment.
